Hackathon Winners

Herbommez, Pauline - PFMH

Wed 08/02/2023 09:28

To:{ { SocietyNotices } } <SocietyNotices@etoncollege.org.uk>;

Dear all,

Last year, the STEM committee and Computer Science society have excitingly partnered with E@E to host **an environmental-themed hackathon** online running in concurrency with COP27 to incentivise action. Hackathons are competitions where people work in teams to implement and pitch solutions that tackle societal problems in the form of code or no-code applications.

Congratulations to:

Winner

Radiaction by Shi KS ME (Coll), Kurumlu (RCH) , H. Kim MS OS (WING) and Bamisaye OS (PRKB)

Runner-up:

Eco Loader by Hart MS (AGDF) and Mountain (IRG)

Predictor by Sun (NPTL)

All finalists projects were kindly judged by Ruhil Vikash, a senior analytics manager at Apple.

Should you wish to see the projects; here are the links:

[Predictor](#)

Many thanks to the organisers: Ludovico Mazzocchi, James Tcheng, Richard Kim for their wonderful work and to all the participants for their incredible ideas.

With kind regards,

Mademoiselle Herbommez
